

Standard Offer Workshop Issues as Updated Following Workshop October 8, 2009

List of Issues

1. Implementation Issues related to utility projects in queue (GMEU)
2. Payment for metering and metering equipment (GMEU)
3. Oversubscription of queue/autobots, to include consideration of some form of lottery mechanism to allocate assignments in the queue and associated time frame questions (e.g., minutes, hours, day), (Longview and Workshop)
4. Definition of “Other Products” (DPS)
5. Transferring queue positions, especially as it relates to independent developer-led projects that later become utility owned or operated projects (BED)
6. Construction of project in accordance with Attachment A (Southport)
7. Rating of nameplate project capacity (Encore)
8. Status of utility PPAs for renewable resources (BED)
9. Definition of Plant/ groups of facilities (Southport, VEPPI)
10. Cost allocation of Facilitator costs (VEPP)
11. Sharing of costs and benefits of utility projects (GMEU)
12. Utility payment of facilitator fees (GMEU)
13. Scope of data collection from projects (DPS)
14. Clarifying site control as it relates to the queue and the time when application is filed (Workshop)
15. Clarify standing of qualifying utility projects or projects that may qualify as utility projects in relation to queue ceiling and sub-caps prior to award of standard offer contracts. (Workshop)
16. Clarify who is eligible to occupy a space in the queue relative to their ability to receive a standard offer. (E.g., Does the entity that would hold the standard offer contract also need to be the entity that fills in the application and/or occupies space in the queue?). (Workshop)
